

THANK YOU, MIT

8 JANUARY 2011

Today when I got placed at Infosys, I feel very happy and satisfied. I still remember the first day of the college...it was a bright day marking a new beginning of my life and an aspiring mind with many ambitions and desires, aiming to achieve something life stepped into MIT... MIT has nurtured and molded me in such a way that today I m ready to face the world full of new opportunities...

The teachers always taught us something more than the books....

At MIT I got many opportunities. Some of the big ones include, getting a chance to work as a team leader on the live project of developing a 'Knowledge Portal', an ETH project. ETH is an initiative by Dr.Vijay Bhatkar. Getting an opportunity of anchoring in German language an event where MR. Klaus Endress, CEO of Endress & Hauser inaugurated our Instrumentation lab. My college gave me my dream job of working at Infosys.

All the efforts which my teachers and I had put in have bore a fruit.

My sincere thanks to all my teachers and well wishers!!!

I shall always try to be worthy of whatever my college has bestowed upon me and I will try my level best to meet expectations of my college.

It is my earnest desire to spread the glory of my college, 'MARATHWADA INSTITUTE OF TECHNOLOGY, AURANGABAD' wherever I go!!!

ALL THE BEST MIT!!!
